# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

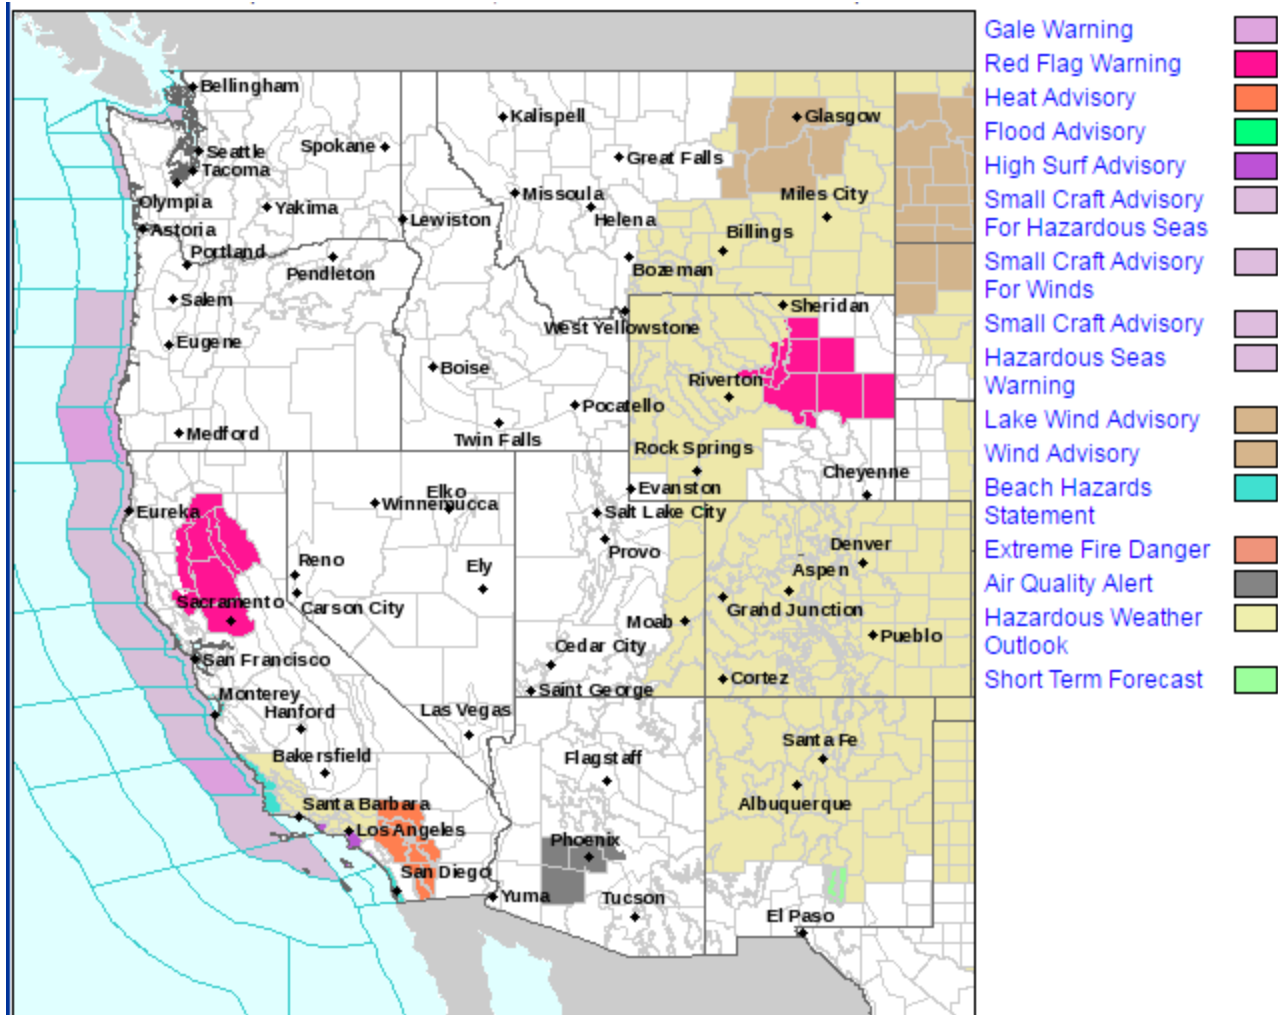

High pressure will build over the Great Basin and produce hot and dry weather throughout Northern California through Wednesday. Temperatures will be 5-10 degrees above normal and humidity will drop to 7-15% each afternoon. Diurnal slope winds will prevail in inland areas - downslope during nights and mornings and upslope in afternoons. These winds will reach 5-10 mph with gusts to 20 mph in wind-prone areas. Overnight humidity recovery will also be poor in many inland areas (less than 40%). There is a slight chance of thunderstorms from the Cascade-Sierra crest east late Wednesday as moisture moves northward around the high pressure. By Thursday the high will weaken and a low pressure trough deepening off the west coast will begin a cooling trend in the North Ops region. This trend will continue through next weekend, with temperatures cooling back to near normal. The trough will bring another slight chance of showers or thunderstorms over the higher terrain in the north and east late Friday and Saturday.

## **SOUTHERN CALIFORNIA**

An area of high pressure off the California Coast will merge with a high pressure area over the Deep South over Northern Arizona bringing a warming trend and very low humidity away from the coastal areas through Tuesday. Maximum temperatures will be in the 80s to low 90s across the mountains with 90s to 102 in the valleys today. Widespread triple digit heat will occur across the valleys and foothills Sunday through Tuesday. Minimum humidity will be mainly in the single digits and teens away from the coastal areas through Tuesday along with poor humidity recovery at night. Local northerly winds of 10 to 20 mph with gusts to 35 mph will surface across the mountains of Santa Barbara, Ventura, and Los Angeles Counties this morning. Otherwise, winds will be light through Tuesday. The high pressure area will shift to the east bringing a slow cooling trend and a little increase in humidity to the area Wednesday and Thursday. Southeast to south flow aloft will bring isolated afternoon showers and thunderstorms to the Sierra and to the mountains and deserts of Southern California east of the Cajon Pass Wednesday and Thursday. Strong and erratic winds will be possible in and near any thunderstorms that develop.

## Emergency Management Assistance Compact (EMAC)

In response to the City of Cleveland's request the California Highway Patrol (CHP) to provide 300 officers and Cal OES will provide 1 liaison to assist the City of Cleveland Police Department with crowd control support during a major event from 07/15/16 through 07/22/16.

## CAL OES MISSIONS

### New Cal OES Missions

#### 2016-SREOC-24549, City of Bishop, Inyo County

A conference call with Southern Region, DWR and Inyo County was conducted today based on Inyo County's request for state assistance in the form of a consulting Hydrologist to help them form an action plan to mitigate minor, widespread flooding in the west side of Bishop. Approximately 100 homes have saturated soils due to the water table and there is some sporadic overflow in ponds and irrigation ditches.

- Liz Bryson from the DWR Flood Operations Center and her staff asked several technical questions to get a better awareness of which DWR staff should be detailed via a mission tasking to assist the County. They indicated they should be able to provide appropriate staff.
- The County has a current drought Proclamation of Local Emergency and may amend their current proclamation to include the current emergency, pending the next meeting of the Board of Supervisors.

### Ongoing Cal OES Missions
